## Papers

### **1995.**

Petar S. Matavulj, Dejan M. Gvozdić, Jovan B. Radunović, and Jovan M. Elazar. Nonlinear Pulse Response of P-i-N Photodiode, *Proceedings 39th ETRAN Conference (ETTRAN'95)*, pp. 65-68, vol. 1, Zlatibor, Yugoslavia, 1995.

### **1996.**

P. S. Matavulj, D. M. Gvozdić, J. B. Radunović, and J. M. Elazar. Nonlinear Pulse Response of P-i-N Photodiode Caused by the Change of the Bias Voltage, *International Journal of Infrared and Millimeter Waves*, pp. 1519-1528, vol. 17, no. 9, 1996.

P. S. Matavulj, D. M. Gvozdić, and J. B. Radunović. The Influence of Nonstationary Carrier Transport on the Bandwidth of P-i-N Photodiode, *Publications of the Faculty of Electrical Engineering, University of Belgrade, Series: Engineering Physics*, pp. 3-18, 1996.

P. Matavulj, D. Gvozdić, and J. Radunović. The Absorption Layer Thickness and Bandwidth of P-i-N photodiode, *Proceedings 40th ETRAN Conference (ETTRAN'96)*, pp. 64-67, Budva, Yugoslavia, 1996.

### **1997.**

Petar S. Matavulj, Dejan M. Gvozdić, and Jovan B. Radunović. The Influence of Nonstationary Carrier Transport on the Bandwidth of P-i-N Photodiode, *IEEE/OSA Journal of Lightwave Technology*, pp. 2270-2277, vol. 15, no. 12, 1997.

Petar S. Matavulj. Analysis of the Nonlinear and Nonstationary Response of a P-i-N Photodiode Made of a Two-Valley Semiconductor, *Master thesis*, Faculty of Electrical Engineering, Belgrade, 1997.

P. S. Matavulj, D. M. Gvozdić, and J. B. Radunović. Analysis of the Linear and Nonlinear Time Response of a P-i-N Photodiode by a Two-Valley Model, *Proceedings 21st International Conference on Microelectronics (MIEL'97)*, pp. 331-334, vol. 1, Niš, Yugoslavia, 1997.

P. Matavulj and J. Radunović. The Influence of Strong Incident Optical Radiation on P-i-N Photodiode Response, *Proceedings 41st ETRAN Conference (ETTRAN'97)*, pp. 117-120, Zlatibor, Yugoslavia, 1997.

**1998.**

Dušan S. Golubović, Petar S. Matavulj, and Jovan B. Radunović. The Frequency Response of Resonant Cavity Enhanced P-i-N Photodiode, *Proceedings 23rd International Conference on Infrared and Millimeter Waves*, pp. 140-141, University of Essex, Colchester, United Kingdom, 1998.

D. S. Golubović, P. S. Matavulj and J. B. Radunović. Linear Response Comparison of Conventional and RCE P-i-N photodiode, *Proceedings 42nd ETRAN Conference (ETRAN'98)*, pp. 109-112, Vrnjačka Spa, Yugoslavia, 1998.

Cvetković, M., Matavulj, P., and Marinčić, A. Modelling P-i-N Photodiode Time Domain Response Using the Green Function Approach, *Proceedings 6th Telecommunications Forum (TELFOR '98)*, pp. 475-478, Beograd, 1998.

**1999.**

Dušan S. Golubović, Petar S. Matavulj, and Jovan B. Radunović. Characterization and Optimization of a Resonant Cavity Enhanced P-i-N Photodiode Response, *International Journal of Infrared and Millimeter Waves*, pp. 109-123, vol. 20, no. 1, 1999.

M. Cvetković, P. S. Matavulj, A. Marinčić and J. B. Radunović. Analysis of the Finite-Impulse-Response (FIR) Filters Implementation in the Modeling of the Single-mode Optical Fiber, *Proceedings 4th International Conference on Telecommunications (TELSIX'99)*, pp. 325-328, vol. 1, Niš, Yugoslavia, 1999.

Dušan S. Golubović, Petar S. Matavulj and Jovan B. Radunović. Transient Response of Conventional and RCE P-i-N Photodiode Illuminated with Strong Optical Radiation, *Proceedings 43rd ETRAN Conference (ETRAN'99)*, pp. 182-185, Zlatibor, Yugoslavia, 1999.

D. S. Golubović, P. S. Matavulj and J. B. Radunović. Analysis of Resonant Cavity Influence on P-i-N and Schottky Photodetector Characteristics, *Proceedings 7th Telecommunications Forum (TELFOR '98)*, pp. 395-398, Belgrade, Yugoslavia, 1999.

**2000.**

Petar S. Matavulj, Dušan S. Golubović, and Jovan B. Radunović. Comparison of nonlinear and nonstationary response of conventional and resonant cavity enhanced *p-i-n* photodiode, *Journal of Applied Physics*, pp. 3086-3092, vol. 87, no. 6, 2000.

D. S. Golubović, P. S. Matavulj and J. B. Radunović. Resonant cavity-enhanced Schottky photodiode – modelling and analysis, *Semiconductor Science and Technology*, pp. 950-956, vol. 15, 2000.

M. Cvetković, P. Matavulj, J. B. Radunović and A. Marinčić. Analysis of the High Bit-rate 1.55 $\mu\text{m}$  Lightwave System with the Limited P-i-N Photodiode Band-

width, *Proceedings 22nd International Conference on Microelectronics (MIEL 2000)*, pp. 603-606, vol. 2, Niš, Yugoslavia, 2000.

Dušan S. Golubović and Petar S. Matavulj. Schottky Photodiode Response Analysis, *Proceedings 44th ETRAN Conference (ETRAN2000)*, pp. 247-250, Soko Spa, Yugoslavia, 2000.

Milena D. Davidović, Petar S. Matavulj i Jovan B. Radunović. SPICE model of Single Quantum Well Laser, *Proceedings 44th ETRAN Conference (ETRAN2000)*, pp. 219-222, Soko Spa, Yugoslavia, 2000.

#### **2001.**

M. Cvetković, P. Matavulj, J. Radunović and A. Marinčić. An InGaAs P-i-N Photodiode Model: Description and Implementations in the Analysis of the 1.55 $\mu$ m Lightwave System, *Journal of Optical Communications*, pp. 24-31, vol. 22, no. 1, 2001.

P. S. Matavulj and J. B. Radunović. Real Single Quantum Well Laser Frequency Response, *International Journal of Infrared and Millimeter Waves*, pp. 863-870, vol. 22, no. 6, 2001.

#### **2002.**

Petar S. Matavulj. Contribution to the Analysis of High-Speed Single Quantum Well Laser Response: Effect of Leakage Current, *Ph.D. Thesis*, Faculty of Electrical Engineering Belgrade, 2002.

Jovan B. Radunović and Petar S. Matavulj. Complete Equivalent Electric Circuit of Single Quantum Well Laser, *Proceedings 46th ETRAN Conference (ETRAN2002)*, pp. 175-178, Vrućica Spa, Srpska Republic, Bosnia and Herzegovina 2002.

Petar S. Matavulj. Response Analysis of Single Quantum Well Laser, *Proceedings 46th ETRAN Conference (ETRAN2002)*, pp. 171-174, Vrućica Spa, Srpska Republic, Bosnia and Herzegovina 2002.

## **Projects**

### **1997-2000.**

Project of Ministry of science, technology and development of Republic Serbia:  
*Microelectronics, optoelectronics and microsystem technology.* Subproject: *Modeling of electronic processes and components.*

### **1998-2000.**

Project of Ministry of science of Federal Republic of Yugoslavia:  
*Theoretical and experimental research of semiconductor microstructures.*

Technological project of Ministry of science, technology and development of Republic Serbia:  
*Development manufacture technology and design of microelectronic components and systems.*

### **1998-**

Project of Faculty of Electrical Engineering in Belgrade:  
*Measuring and characterization of LAN and fiber optic cable systems.*

### **2002-2005.**

Project of Ministry of science, technology and development of Republic Serbia:  
*Theoretical analysis of electronic and optical characteristics of nanostructures.*
